

*For over 100 years, we have inspired STEAM education,
wonderment and even space exploration by sharing and preserving our craft.*

Dear Friends of Stellafane,

With the centennial of the iconic Stellafane Convention, we look up from our telescope making and have even more reason to celebrate...the premiere of a new feature length film about the Springfield Telescope Makers! *Stellafane and Beyond*, by award-winning director Tara Roberts Zabriskie will be shown on August 14th as part of our 100 Year Celebration of our Convention.

Please be a part of our mission to preserve and share the art of telescope making, the artistry of the film and the collaboration with the town of Springfield where it all began. Sign on as a sponsor of this special evening at the stunningly refurbished Great Hall at 100 River Street where you will cross the red carpet, mingle with astronomy buffs and citizens of Springfield and enjoy the first showing of the film.

Your sponsorship at a level provided below or distinctive item for our silent auction will support our vision to preserve and share our art and the ensure the preservation of our spectacular Breezy Hill for the benefit of future generations. Your business or organization will be recognized for your support which will attract residents and businesses of our town and visitors to Springfield to attend our convention, detailed below.

Where your support goes:

Proceeds will go directly to the Springfield Telescope Makers, Inc. to support expansion of our STEAM and outreach programs and preservation of our lands and observatories to bring the wonder of our dark skies for future generations.

We look forward to speaking with you about how your support of this event will meet your marketing and philanthropic goals. ***Clear skies!***

It is also true that if an amateur starts out to build a telescope just for fun he will find, before his labors are over, that he has become seriously interested in the wonderful mechanism of our universe...Russell Porter, Founder
